Future Inspired by Legacy

Building a legacy

In a country where everyone deserves the comfort of cooling, our story began in 1988 — with a simple promise to make cooling accessible to India's middle-class. With that in mind, we launched a new category of evaporative air cooling and revolutionised cooling in the country.

Our dedicated approach to quality and innovation has propelled us to become the world's largest air cooler manufacturer, a testament of the trust and loyalty we've garnered from generations of customers.

As pioneers of cooling systems in India, we are aware of our duty to the environment. Consequently, we developed breakthrough technology to fight the adverse effects of climate change.

Then we thought, shouldn't we build on this legacy!

Building on our legacy

Building on our legacy, we are delighted to announce Symphony's foray into the realm of luxury water heating systems. Having revolutionized air coolers and set the trend with various innovations, Symphony is now elevating everyday experiences to the realm of luxury.

Our geysers epitomize state-of-the-art technology and are underpinned by Symphony's promise of quality and reliability. Designed to dazzle bathrooms, our premium geysers are also energy-efficient, ensuring environmental sustainability.

After all, there's nothing more relaxing than a perfectly warm bath that refreshes you in the morning and relaxes you at night. Our growing middle class has matured and now seeks the luxuries emblematic of the New India.

Symphony[®] SPA

Introducing the latest revolution in geyser technology: **Symphony Spa**. More than just heating your water, it transforms your bathing experience.

Care for your hair

While premium quality and impressive performance are standard expectations, Symphony geysers go beyond them. Each Symphony geyser features a special PUROPOD filtration cartridge designed to nurture your hair.

This advanced 9-layer multi-stage cartridge contains multiple water conditioners, effectively filtering out harmful chemicals and sediments, and treating hard water. As a result, your hair is left nourished, healthy, resilient, and your skin is protected.

REPLACEABLE CARTRIDGE

Control at your finger tips

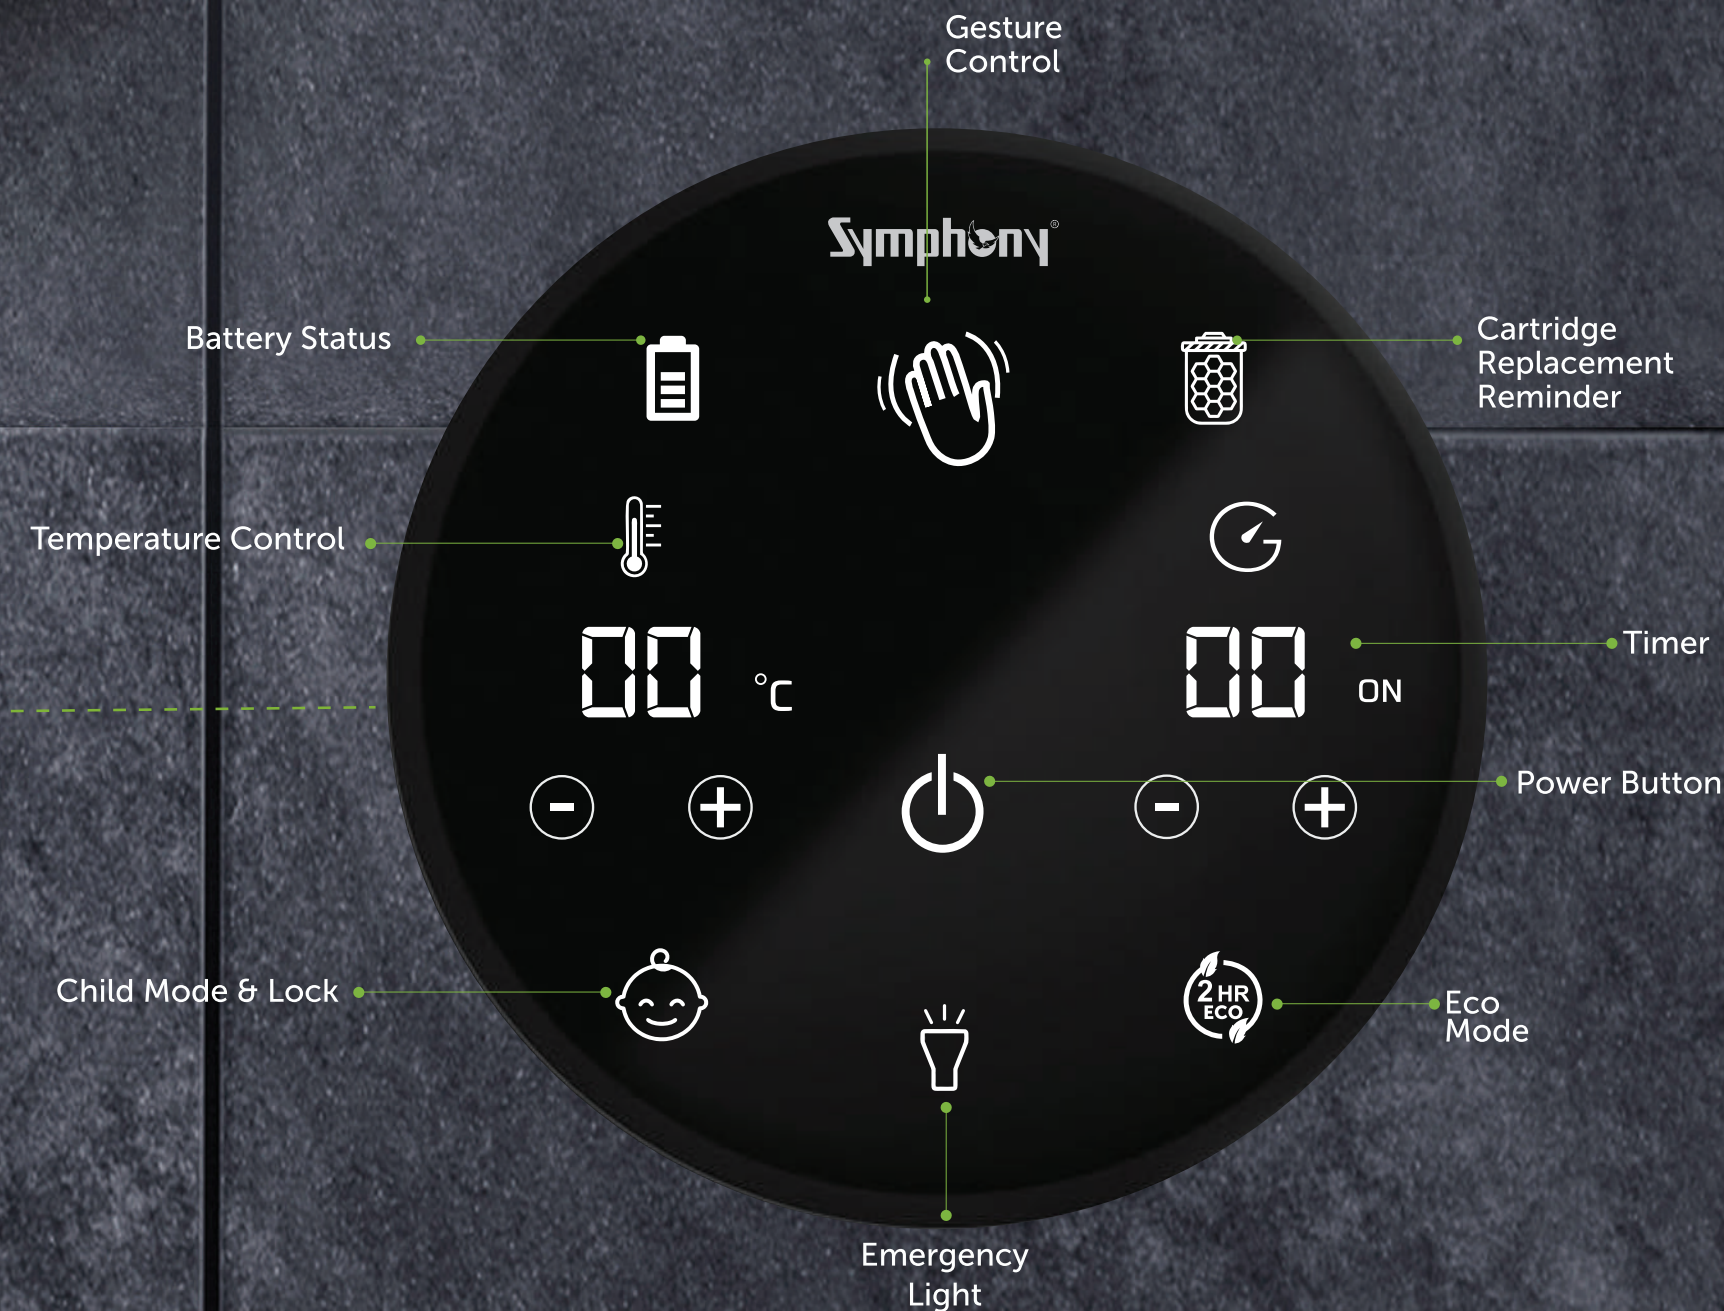

Presenting India's first geyser featuring a state-of-the-art control panel that will elevate your water heating experience. Just lift your finger, and the control panel will take care of the rest.

From an anti-burn child lock and temperature control settings to a timer for convenience, this panel gives you all the control you need. Experience the ultimate convenience with Symphony's advanced control panel.

Powered by AI, this 2-way controller understands your geyser's requirements, alerting you when to call a technician. Technology at its best, isn't it?

Features of Symphony Geysers

Symphony®
**TITANIUM™
PRO**

Heavy-duty heating element for faster heating:

Heats water quickly and efficiently.

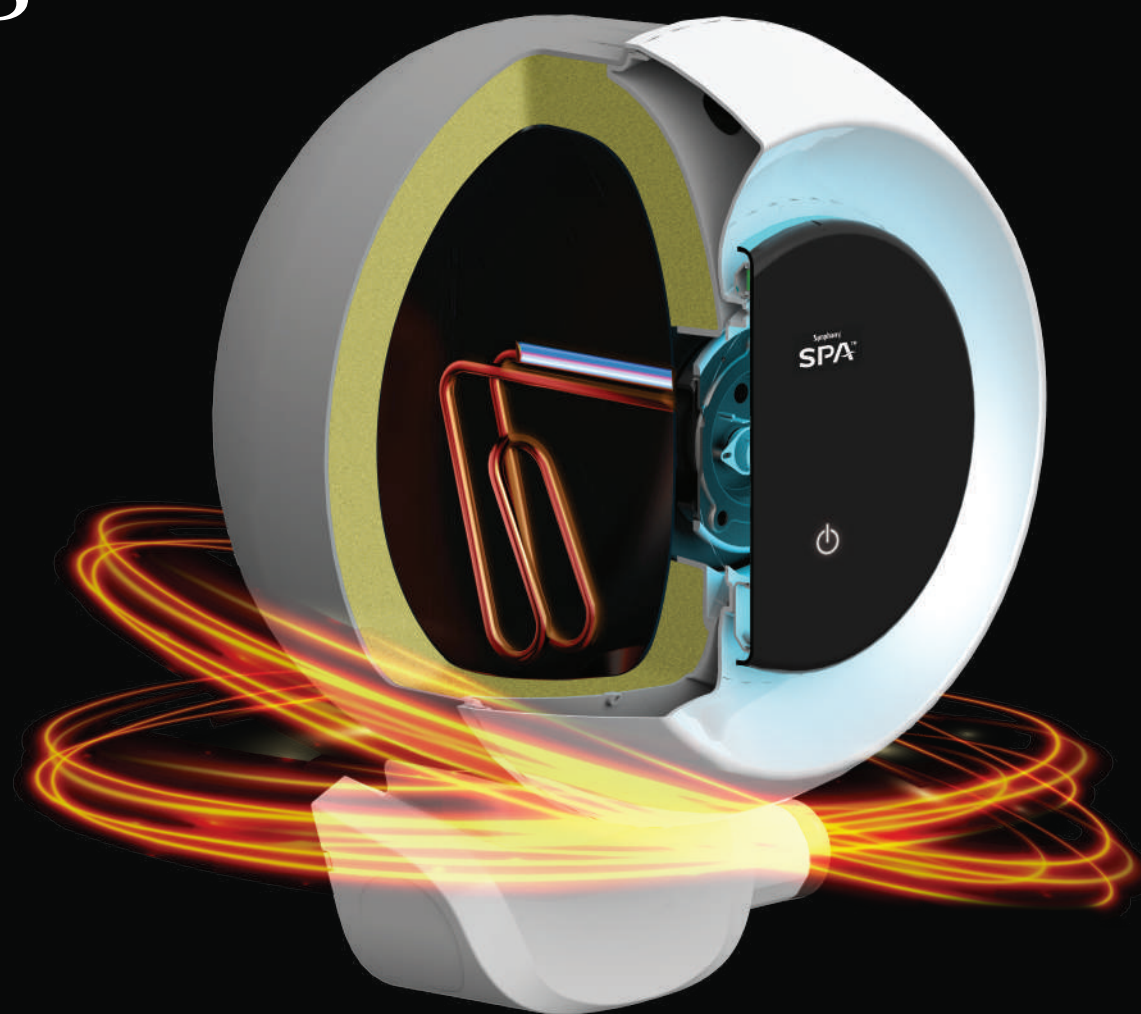

Mood light:

For aesthetic appeal and ambience.

5-star rating for energy efficiency:

Highly energy-efficient, reducing electricity bills.

Symphony Titanium PRO Superior Glassline coated tank:

Offers enhanced durability and protection against corrosion.

Incoloy glass coated heating element for durability:

Ensures a longer lifespan and efficient heating performance.

Magnesium anode rod prolongs heating element life:

Extends the lifespan of the heating element by preventing corrosion.

8 bar pressure capacity, ideal for high-rise buildings with pressure pumps:

Suitable for buildings with high water pressure requirements.

Superior PUF insulation retains hot water for extended periods:

Keeps water hot for long, improving energy efficiency.

Shock-proof body ensures safety:

Provides safety against electric shocks.

Default child-safe mode prevents accidents:

Ensures safety by preventing accidental burns.

Triple protection for your family with thermal cutout, safety valve and ELCB:

Comprehensive safety features to prevent overheating, pressure build-up, and leakage current.
