August 11, 2020: Mr. Nrupesh Shah, Executive Director of Symphony Ltd. has commented:

- Symphony Limited launched for 2019-20 pathbreaking new models across the products in Residential, Commercial and Centralised air cooling segments. They are innovative in design, format and features. They have received overwhelming response.
- The company released a campaign in late March and April to educate consumers about the health benefits of air coolers over other forms of cooling, since air coolers allow fresh air whereas other forms of cooling recirculate the same air which may bear infections. The company also launched a unique digital media campaign to promote online to offline sales. This campaign was a resounding success in terms of inquiries generated and could have resulted in significant sales were it not for the hurdles faced due to the lockdown. It nevertheless did result in good sales of channel inventory. It would help in reducing the negative impact of COVID-19 on sales in remaining period of FY 2020-21.

### **Outlook:**

The demand has taken a hit in Q1 of FY 2020-21 due to nationwide lock down due to COVID-19 Pandemic. There are uncertainties about the performance in FY 2020-21. However, Company is quite confident and optimistic of its medium to long term prospects. The company has initiated certain measures and strategies (taking the advantage of slowdown) which may yield sizeable benefits once normalcy returns.
