Majority business of the Company is on Cash and Carry basis, for credit business the Company trades with recognised and credit worthy third parties. In addition, receivable balances are monitored on an on-going basis with the result that the Company's exposure to bad debts is not significant. The Company has used a practical expedient by computing the expected credit loss allowance for trade receivables for credit sales based on provision matrix. The provision matrix takes into account historical credit loss experience and adjusted for forward-looking information. The expected credit loss allowance is based on the ageing of the days the receivables are due and the rates as given in the provision matrix. The provision matrix at the end of the reporting period is as follows: □
